LARGEST TRIATHLON MAGAZINE

### **CycleOps Fluid 2 \$329**

CycleOps revamped the Fluid with PowerTuned resistance by using a pretty darn good cyclist (Floyd Landis) to provide road and TT-position resistance to help determine a fluid viscosity optimized for both, for a truer road feel. It also features a new cam lever allowing you to remove and reinstall flywheel resistance to the tire with the exact same pressure from ride to ride. [saris.com](http://saris.com)
